Theme which  
we are  
interested in

**Gender gap**

**Environment**

**Zero hunger**

**Energy**

## Gender gap in society

# The problems about gender gap in Japan

- Women don't need to work, but do housework
- Because women will get pregnant and temporary leave from the work. So adopting women is not effective for companies and hospitals.
- In Japanese medical school women examinee had points taken off on the entrance exam, just because "they are WOMEN"

Gender gap in  
society

**It causes  
the stereotype in Japan**

We should change the gender stereotype in our country

It is difficult to understand his or her gender problems.

- Join workshop to get experience
- share your opinions each other
- We mustn't jump to the conclusion

# Environmental issues

# Plastic

- Cup & Straw
- Shopping bag
- **Over-packaging**

# Over-packaging

## Zero hunger

Eradicating extreme poverty & hunger was one of the MDGs' goals. The proportion of undernourished people in the developing regions has reduced almost by half since 1990.

More than 800 million people are still malnourished.

However, Japan has problems of Food loss

# Zero hunger

There are two solutions to get rid of hunger in the world.

- Make the most of the food
  - Decrease food loss
  - Raise food self-sufficiency
- Increase food production
  - Further development of natural science related to agriculture

# Sustainable energy

## *Energy self-sufficiency rate (2015)*

# Energy

- We should stop using harmful things for Earth  
→ replacing the energy to safe sustainable one

Solution 1  
increase more  
sustainable  
energy

Take the case of solar power generation in Germany, case of wind power generation in UK

- These countries make the sustainable energy power in a suitable way for the local environment
- Government supports it

Solution 2  
Reduce  
energy  
consumption

## Public transportation

- Electric mobility
- Car Sharing

**Education =**
